

CADTalk for SYSPRO

The benefits of CADTalk

- Eliminate duplicate data entry and ensuing errors
- Reduce Engineering to Production lead-time
- Keep CAD Drawings and SYSPRO ERP data in sync and up-to-date
- Keep people using the tools they know
- Map any CAD file property to SYSPRO ERP field
- CAD files can be viewed directly inside the interface
- SYSPRO ERP data validation to ensure accurate data integrity
- Intuitive indented BOM view; edit and create at any level and use simple drag and drop
- Utility template codes for quick new item creation using existing data within SYSPRO ERP
- Create routes and structures from templates or manually on-the-fly
- CAD Files can be dragged directly from the File System into the Assembly Tree, allowing the user combine BOMs from multiple CAD systems
- Import/export live data to and from SYSPRO ERP—no file export and uploads required

CADTalk features

- Use fully integrated real-time solution
- Manage multiple levels of BOMs simultaneously
- Map any CAD file property to SYSPRO ERP field
- Create and update items, routings and structures within SYSPRO ERP
- Drag/drop and quick data entry all with graphical interface
- View model and drawings from within the application
- Import and merge from CAD and/or from SYSPRO ERP data

Integration with SYSPRO

- CADTalk integrates with SYSPRO Inventory and Bill of Material modules
- CADTalk integrates with AutoCad, Autodesk Inventor, Solid Edge, SolidWorks
