

Optimum Payroll for SYSPRO

Optimum Payroll is an advanced client/server application that offers a comprehensive, cost effective, in-house payroll system that interfaces with SYSPRO by importing labor transactions from the SYSPRO Work in Progress module. Payroll transactions are subsequently imported into the SYSPRO Cash Book and/or General ledger modules.

The system allows for an unlimited number of payrolls without conflict and offers the ability to process void and on-demand checks. Paying employees has never been so cost-effective, convenient, and most importantly, accurate.

The process of adhering to government requirements is streamlined with Optimum Payroll. The system offers numerous reporting options such as 940, 941, W2, W3, 1099 Misc., 1099-R, and much more.

Security is imperative when dealing with payroll information. Data can be secured at the menu, program, company, organization, and/or employee level. Confidential data such as social security number and pay rate may also be secured for select users.

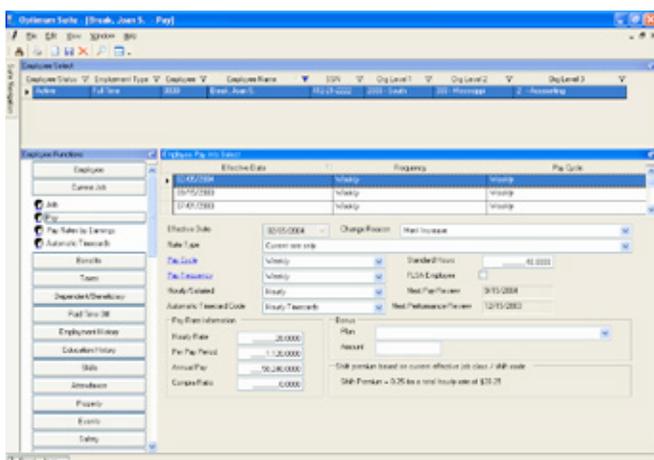

Optimum Payroll can be implemented as a stand-alone module or integrated to Optimum Human Resources and/or Optimum Time & Attendance. When integrated, the products utilize one master database which eliminates redundant data entry. Integration to the other Optimum applications ensures a company's payroll and HR departments are always working with current employee information.

The benefits of Optimum Payroll

- Track, maintain, and report unlimited deductions and benefits
- Automated arrears processing
- Payee check printing or payment via EFT
- Tracking of beneficiaries and dependents
- Effectively compute garnishment and child support orders in accordance with federal and state guidelines
- Unlimited accruals can be defined for vacation, sick or paid time off:
 - Plans can be tracked by calendar year or anniversary date
 - Awards can be granted annually, per pay period or other frequencies such as monthly
 - All detail may be printed on an employee's pay check or direct deposit advice
 - Accrual detail is also displayed in Optimum Time and Attendance and Employee Self-Service

Integration with SYSPRO

- Requires:
 - SYSPRO Payroll Interface
 - SYSPRO Work in Progress
 - SYSPRO General Ledger modules
- SYSPRO Cash Book is an optional module

Optimum Payroll for SYSPRO

Optimum Payroll features

Taxes

Optimum Payroll supports all federal, state and local tax reporting and provides updates to federal and state tax tables. Additionally, Optimum offers an optional tax filing service for those companies who wish to outsource tax deposits and tax filing. The tax features in Optimum Payroll include:
